## MECHANISMS OF AGEING AND DEVELOPMENT

### SUBJECT INDEX

*Volume 47 (1989)*

- acetyl-L-carnitine, aging, brain regions, non-synaptic mitochondria bioenergetics, cholinergic metabolism, 39
- adhesive proteins, fibronectin, indirect immunoperoxidase staining technique, ageing, primary open-angle glaucoma, trabecular meshwork, juxtacanalicular zone, 145
- age, Hb-O<sub>2</sub>-affinity, DPG 2,3-, hemoglobin, sex hormones, gender difference, 229
- age, human serum, cell migration, human fetal lung fibroblasts, human skin fibroblasts, 25
- age-related change, serotonin content, serotonin release, rat platelets, collagen, thrombin, 65
- aged rats, catecholamines, visual system, HPLC-ED, 77
- ageing, cerebellar cortex, glutamate dehydrogenase, microphotometry, rat, 199
- ageing, fibronectin, indirect immunoperoxidase staining technique, primary open-angle glaucoma, trabecular meshwork, juxtacanalicular zone, adhesive proteins, 145
- age effects, silver stained nucleolar organizer regions (AgNORs), multiple endocrine neoplasia-type II, correlation, fetal lymphocytes, 17
- aging, acetyl-L-carnitine, brain regions, non-synaptic mitochondria bioenergetics, cholinergic metabolism, 39
- aging, bone marrow, T-lymphocytes, thymic epithelial cells, immunosenescence, 207
- aging, brush border enzymes, kidney, nutrition, rats, 55
- aging, calcium absorption, Ussing chamber, vitamin D, 221
- aging, neuron, potassium current, 47
- aging, rat skin cells, UV-induced pyrimidine dimers, DNA repair, persisting DNA damage, 253
- aging, thymus, T cell, immune function, gonadectomy, flow cytometry, 175
- aging, zinc, liver, metallothionein, mice, 241
- aging and immunosuppression, immunosuppression, antibody-isotypes, Friend virus replication and aging, immune suppression and aging, aging and virus replication, 159
- aging and virus replication, immunosuppression, antibody-isotypes, Friend virus replication and aging, immune suppression and aging, aging and immunosuppression, 159
- aging brain, CW1 mice, medial habenula, hippocampus, NBM, 133
- aldose reductase, glucose, fibroblast, growth factor, senescence, 265
- antibody-isotypes, immunosuppression, Friend virus replication and aging, immune suppression and aging, aging and immunosuppression, aging and virus replication, 159
- bone marrow, T-lymphocytes, aging, thymic epithelial cells, immunosenescence, 207
- brain regions, aging, acetyl-L-carnitine, non-synaptic mitochondria bioenergetics, cholinergic metabolism, 39
- brush border enzymes, aging, kidney, nutrition, rats, 55
- calcium absorption, Ussing chamber, vitamin D, aging, 221
- catecholamines, visual system, aged rats, HPLC-ED, 77
- cell cycle variability, *in vitro* senescence, cell generation-number, 187
- cell generation-number, *in vitro* senescence, cell cycle variability, 187
- cell migration, human serum, age, human fetal lung fibroblasts, human skin fibroblasts, 25
- cerebellar cortex, ageing, glutamate dehydrogenase, microphotometry, rat, 199
- cholinergic metabolism, aging, acetyl-L-carnitine, brain regions, non-synaptic mitochondria bioenergetics, 39
- collagen, age-related change, serotonin content, serotonin release, rat platelets, thrombin, 65
- consciousness, monitors, sensory mapping, memory, time sense, self-awareness, decision making, 85
- correlation, silver stained nucleolar organizer regions (AgNORs), multiple endocrine neoplasia-type II, age effects, fetal lymphocytes, 17

- CW1 mice, aging brain, medial habenula, hippocampus, NBM, 133
- decision making, monitors, sensory mapping, consciousness, memory, time sense, self-awareness, 85
- DNA repair, aging, rat skin cells, UV-induced pyrimidine dimers, persisting DNA damage, 253
- DPG 2,3-, Hb-O<sub>2</sub>-affinity, hemoglobin, sex hormones, gender difference, age, 229
- fetal lymphocytes, silver stained nucleolar organizer regions (AgNORs), multiple endocrine neoplasia-type II, correlation, age effects, 17
- fibroblast, glucose, aldose reductase, growth factor, senescence, 265
- fibronectin, indirect immunoperoxidase staining technique, ageing, primary open-angle glaucoma, trabecular meshwork, juxtacanalicular zone, adhesive proteins, 145
- flow cytometry, thymus, T cell, immune function, aging, gonadectomy, 175
- Friend virus replication and aging, immunosuppression, antibody-isotypes, immune suppression and aging, aging and immunosuppression, aging and virus replication, 159
- gender difference, Hb-O<sub>2</sub>-affinity, DPG 2,3-, hemoglobin, sex hormones, age, 229
- glucose, fibroblast, aldose reductase, growth factor, senescence, 265
- glutamate dehydrogenase, ageing, cerebellar cortex, microphotometry, rat, 199
- glutathione, mice, glutathione S-transferase, protein-free diet, 1
- glutathione S-transferase, mice, glutathione, protein-free diet, 1
- gonadectomy, thymus, T cell, immune function, aging, flow cytometry, 175
- growth factor, glucose, fibroblast, aldose reductase, senescence, 265
- Hb-O<sub>2</sub>-affinity, DPG 2,3-, hemoglobin, sex hormones, gender difference, age, 229
- hemoglobin, Hb-O<sub>2</sub>-affinity, DPG 2,3-, sex hormones, gender difference, age, 229
- hippocampus, aging brain, CW1 mice, medial habenula, NBM, 133
- HPLC-ED, catecholamines, visual system, aged rats, 77
- human fetal lung fibroblasts, human serum, age, cell migration, human skin fibroblasts, 25
- human serum, age, cell migration, human fetal lung fibroblasts, human skin fibroblasts, 25
- human skin fibroblasts, human serum, age, cell migration, human fetal lung fibroblasts, 25
- immune function, thymus, T cell, aging, gonadectomy, flow cytometry, 175
- immune suppression and aging, immunosuppression, antibody-isotypes, Friend virus replication and aging, aging and immunosuppression, aging and virus replication, 159
- immunosenescence, bone marrow, T-lymphocytes, aging, thymic epithelial cells, 207
- immunosuppression, antibody-isotypes, Friend virus replication and aging, immune suppression and aging, aging and immunosuppression, aging and virus replication, 159
- indirect immunoperoxidase staining technique, fibronectin, ageing, primary open-angle glaucoma, trabecular meshwork, juxtacanalicular zone, adhesive proteins, 145
- in vitro* senescence, cell generation-number, cell cycle variability, 187
- juxtacanalicular zone, fibronectin, indirect immunoperoxidase staining technique, ageing, primary open-angle glaucoma, trabecular meshwork, adhesive proteins, 145
- kidney, aging, brush border enzymes, nutrition, rats, 55
- liver, zinc, metallothionein, mice, aging, 241
- medial habenula, aging brain, CW1 mice, hippocampus, NBM, 133
- memory, monitors, sensory mapping, consciousness, time sense, self-awareness, decision making, 85
- metallothionein, zinc, liver, mice, aging, 241
- mice, glutathione, glutathione S-transferase, protein-free diet, 1
- mice, zinc, liver, metallothionein, aging, 241
- microphotometry, ageing, cerebellar cortex, glutamate dehydrogenase, rat, 199
- monitors, sensory mapping, consciousness, memory, time sense, self-awareness, decision making, 85
- multiple endocrine neoplasia-type II, silver stained nucleolar organizer regions (AgNORs), correlation, age effects, fetal lymphocytes, 17
- NBM, aging brain, CW1 mice, medial habenula, hippocampus, 133

- neuron, aging, potassium current, 47
- non-synaptic mitochondria bioenergetics, aging, acetyl-L-carnitine, brain regions, cholinergic metabolism, 39
- nutrition, aging, brush border enzymes, kidney, rats, 55
- persisting DNA damage, aging, rat skin cells, UV-induced pyrimidine dimers, DNA repair, 253
- potassium current, aging, neuron, 47
- primary open-angle glaucoma, fibronectin, indirect immunoperoxidase staining technique, ageing, trabecular meshwork, juxtacanalicular zone, adhesive proteins, 145
- protein-free diet, mice, glutathione, glutathione S-transferase, 1
- rat, ageing, cerebellar cortex, glutamate dehydrogenase, microphotometry, 199
- rats, aging, brush border enzymes, kidney, nutrition, 55
- rat platelets, age-related change, serotonin content, serotonin release, collagen, thrombin, 65
- rat skin cells, aging, UV-induced pyrimidine dimers, DNA repair, persisting DNA damage, 253
- self-awareness, monitors, sensory mapping, consciousness, memory, time sense, decision making, 85
- senescence, glucose, fibroblast, aldose reductase, growth factor, 265
- sensory mapping, monitors, consciousness, memory, time sense, self-awareness, decision making, 85
- serotonin content, age-related change, serotonin release, rat platelets, collagen, thrombin, 65
- serotonin release, age-related change, serotonin content, rat platelets, collagen, thrombin, 65
- sex hormones, Hb-O<sub>2</sub>-affinity, DPG 2,3-, hemoglobin, gender difference, age, 229
- silver stained nucleolar organizer regions (Ag-NORs), multiple endocrine neoplasia-type II, correlation, age effects, fetal lymphocytes, 17
- T-lymphocytes, bone marrow, aging, thymic epithelial cells, immunosenescence, 207
- thrombin, age-related change, serotonin content, serotonin release, rat platelets, collagen, 65
- thymic epithelial cells, bone marrow, T-lymphocytes, aging, immunosenescence, 207
- thymus, T cell, immune function, aging, gonadectomy, flow cytometry, 175
- time sense, monitors, sensory mapping, consciousness, memory, self-awareness, decision making, 85
- trabecular meshwork, fibronectin, indirect immunoperoxidase staining technique, ageing, primary open-angle glaucoma, juxtacanalicular zone, adhesive proteins, 145
- T cell, thymus, immune function, aging, gonadectomy, flow cytometry, 175
- Ussing chamber, calcium absorption, vitamin D, aging, 221
- UV-induced pyrimidine dimers, aging, rat skin cells, DNA repair, persisting DNA damage, 253
- visual system, catecholamines, aged rats, HPLC-ED, 77
- vitamin D, calcium absorption, Ussing chamber, aging, 221
- zinc, liver, metallothionein, mice, aging, 241
